

## Biosafety Clearing-House (BCH)

GENETIC ELEMENT (GENE)

BCH-GENE-SCBD-105197-2

LAST UPDATED: 07 AUG 2014

### General information

Name of genetic element

CaMV 35S Enhancer

EN

Abbreviation

L-35S-CaMV

EN

Category

Other (Leader)

Is this genetic element a synthetic molecule?

No

### Donor organism

Donor organism(s)

[BCH-ORGA-SCBD-12125-5](#) ORGANISM | CAULIFLOWER MOSAIC VIRUS (CAMV) |

Viruses

### Characteristics of the protein coding sequence

### Additional Information

Enhancer sequence of the 35s promoter. The 35S promoter was isolated from the Cauliflower Mosaic Virus (CaMV) and is one of the most widely used promoters in plant transformation.

The 35S promoter is a very strong constitutive promoter, resulting in high levels of gene expression in dicot plants. However, it is less effective in monocots, especially in cereals.
